Subject: Another search help panel request

Mike has requested a search help panel. He needs to find the concept of ranking job posting web sites that would be more successful at attracting good job candidates for an employer based on job details. For example, which job posting web sites are best at attracting engineers in the D.C. area?

Also, I was wondering if anyone has seen the concept of automatically scheduling a meeting (like we do in outlook), but determining (by the computer) who is available, and only sending the invitation to those available?

Mike will come join us around 2:30 today (in 5B55) after our first search help panel at 2.

Thanks,
Susie

382, Image Analysis, 159- 161 for trainable pattern recognition.

706, Data Processing: Artificial Intelligence, 14 for adaptive artificial intelligence computer systems.

48

Neural network:

This subclass is indented under 47.

Subject matter wherein the system uses parallel-distributed processors constructed in hardware or simulated in software.

SEE OR SEARCH CLASS:

382, Image Analysis, 158 for a neural network structure in pattern recognition.

706, Data Processing: Artificial Intelligence, 15- 44 for a neural network, per se.

Anthony Knight

292-3687

49

Expert system:

This subclass is indented under 28.

Subject matter wherein the system is comprised of at least (a) a knowledge base, (b) an inference engine, and (c) a user interface and contains both declarative knowledge (i.e., a fact about an object, event, or situation) and procedural knowledge (i.e., information about a course of action) to emulate the reasoning processes of a human expert in a particular area of expertise.

SEE OR SEARCH THIS CLASS, SUBCLASS:

104, for use of an expert system for design or planning of product manufacturing.

SEE OR SEARCH CLASS:

706, Data Processing: Artificial Intelligence, 45- 61 for an expert system computer system.

2121 -

50

Fuzzy logic:

This subclass is indented under 28.

Subject matter wherein a decision mechanism uses probabilistic or statistical technique (e.g., "IF X is very large THEN...").

SEE OR SEARCH THIS CLASS, SUBCLASS:

51, for statistical process control.

SEE OR SEARCH CLASS:

326, Electronic Digital Logic Circuitry, appropriate subclasses for logic circuits, per se.

CLASS 706 DATA PROCESSING: ARTIFICIAL INTELLIGENCE**1 FUZZY LOGIC HARDWARE**

- 2 . Fuzzy neural network
